RIJKSUNIVERSITEIT GRONINGEN

Behavioral Pharmacology of 5-HT_{1A} Receptor Ligands
studies on the mechanism of action

PROEFSCHRIFT

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus Dr. S. K. Kuipers
in het openbaar te verdedigen op
maandag 15 juni 1992
des namiddags te 2.45 uur precies

door

RUDY SCHREIBER

geboren op 2 mei 1964
te Hamburg

Promotor:

Prof. Dr. B. Bohus

Referenten:

Dr. J. De Vry

Dr. T. Schuurman

Promotiecommissie:

**Prof. Dr. M. Hamon
Prof. Dr. J. M. van Ree
Prof. Dr. J. L. Slangen**

**The studies described in this thesis were carried out at the Institute of Neurobiology,
Department of Psychopharmacology, Troponwerke (Bayer AG), Cologne, FRG.**

**Print: Drukkerij Ten Brink Meppel bv
Cover design: Karin Wink, Leeuwarden**

TABLE OF CONTENTS

I Introduction

Preface	1
1. The Central Serotonergic System	2
1.1. Serotonergic pathways	2
1.2. The serotonergic synaps	4
1.3. The 5-HT _{1A} receptor as a subtype of serotonin receptors	4
2. Functional Properties of the 5-HT_{1A} Receptor	7
2.1. Neurobiological aspects	7
2.1.1. Presynaptic 5-HT _{1A} receptors	7
2.1.2. Postsynaptic 5-HT _{1A} receptors	11
2.2. Physiological aspects	12
2.2.1. Presynaptic 5-HT _{1A} receptors	12
2.2.2. Postsynaptic 5-HT _{1A} receptors	14
2.2.3. Pre- and postsynaptic 5-HT _{1A} receptors	17
3. Animal Models of Anxiety, Impulsivity and Depression	18
3.1. Animal models of anxiety	19
3.2. Animal models of impulsivity	20
3.3. Animal models of depression	21
4. Clinical Effects of 5-HT_{1A} Receptor Agonists in Anxiety, Impulsivity and Depression	23
5. Aim of the Present Studies	24
References	25

II Experimental Part

1. Studies on the neuronal circuits involved in the discriminative stimulus effects of 5-HT _{1A} receptor agonists in the rat.	45
2. Shock-induced ultrasonic vocalization in young adult rats: an animal model for testing the anxiolytic activity of putative anti-anxiety drugs.	65

3.	Studies on the neuroanatomical basis for the anxiolytic effects of the 5-HT _{1A} receptor agonists ipsapirone, buspirone and 8-OH-DPAT in the rat.	85
4.	Neuroanatomical basis for the antidepressant-like effects of the 5-HT _{1A} receptor agonists 8-OH-DPAT and ipsapirone in the rat forced swimming test.	107
5.	Ipsapirone and 8-OH-DPAT reduce ethanol preference in rats: involvement of presynaptic 5-HT _{1A} receptors.	135

III General Discussion

1.	Role of Pre- and Postsynaptic 5-HT_{1A} Receptors in the Anxiolytic, Anti-impulsive and Antidepressive Effects of 5-HT_{1A} Receptor Agonists	155
1.1.	Anxiety	155
1.2.	Impulsivity	156
1.3.	Depression	156
2.	5-HT_{1A} Receptor Agonists: Towards a Hypothesis for Their Mechanism of Action	160
2.1.	5-HT _{1A} receptors and anxiety	160
2.2.	5-HT _{1A} receptors and impulsivity	161
2.3.	5-HT _{1A} receptors and depression	162
2.4.	Role of 1-PP in the mechanism of action of 5-HT _{1A} receptor agonists	162
2.5.	Tolerance or sensitization to the effects of 5-HT _{1A} receptor agonists?	164
2.5.1.	Chronic application of 5-HT _{1A} receptor agonists in "mechanistical" animal models	165
2.5.2.	Chronic application of 5-HT _{1A} receptor agonists in "clinical" animal models	166
2.5.3.	Are sensitivity changes of 5-HT _{1A} receptors involved in the clinical effects of 5-HT _{1A} receptor agonists?	166
3.	Consequences of Present Findings for the Design of New Psychotropic Drugs	168
	References	169
	Summary	177
	Samenvatting	180
